FINANCIAL POLICY

Our goal is to provide the highest quality of healthcare possible for our patients. In order to achieve this goal we need your commitment as well.

- We urge our patients to follow the doctor's recommendations for care. Please keep your appointments as scheduled or call the office within 24 hours to make any changes. In order to attain the level of achievement we both desire, care must be followed.
- I authorize Rubinstein Family Chiropractic to release any information deemed appropriate concerning my physical condition to any insurance company, attorney, or adjuster in order to process any claims for reimbursement for charges incurred by me.
- Chiropractic care in this office deals with vertebral subluxation, and may be billed under the S8990 adjustment code . While we will provide an itemized receipt upon your request, we anticipate that care will not be reimbursed by a third party carrier as this is considered wellness or maintenance care. This does not apply to PI, Medicare or Medicaid. HSA and FLEX spending may still be utilized.
- This notice is not an official Medicare or other insurance carrier decision.
- I authorize the direct payment to Rubinstein Family Chiropractic of any sum I now or hereafter owe by my attorney out of settlement in my case or by any insurance company obligated to make payment to me or Rubinstein Family Chiropractic base in whole or part upon charges made for services received.
- If you have an auto accident, a workers compensation injury or other injury that insurance requires direct billing, you will be expected to complete all the paperwork necessary for us to file the claim on your behalf.
- If you have any questions please see our staff.
- If you need to make special arrangements, please ask. We will do our best to accommodate your financial needs.

I understand that I will be responsible for fees billed to my or my child/children's account for all services received at the time of service. Account balances over 30 days will be charged to my credit card unless prior arrangements have been made.

We accept MasterCard, Visa, American Express, Cash and Checks in exchange for services.

INFORMED CONSENT

We encourage and support a **shared decision making process** between us regarding your health needs. As a part of that process you have a right to be informed about the condition of your health and the recommended care and treatment to be provided to you so that you can make the decision whether or not to undergo such care with full knowledge of the known risks. This information is intended to make you better informed in order that you can knowledgeably give or withhold your consent.

Chiropractic is based on the science which concerns itself with the relationship between structures (primarily the spine) and function (primarily of the nervous system) and how this relationship can affect the restoration and preservation of health.

Adjustments are made by chiropractors in order to correct or reduce spinal and extremity joint subluxations. **Vertebral subluxation** is a disturbance to the nervous system and is a condition where one or more vertebra in the spine is misaligned and/or does not move properly causing interference and/or irritation to the nervous system. The primary goal in chiropractic care is the removal and/or reduction of nerve interference caused by vertebral subluxation.

A chiropractic examination will be performed which may include spinal and physical examination, orthopedic and neurological testing, palpation, specialized instrumentation, radiological examination (x-rays), and laboratory testing.

The chiropractic adjustment is the application of a precise movement and/or force into the spine in order to reduce or correct vertebral subluxation(s). There are a number of different methods or techniques by which the chiropractic adjustment is delivered but are typically delivered by hand. Some may require the use of an instrument or other specialized equipment. In addition, physiotherapy or rehabilitative procedures may be included in the management protocol. Among other things, chiropractic care may reduce pain, increase mobility and improve quality of life.

In addition to the benefits of chiropractic care and treatment, one should also be aware of the existence of some risks and limitations of this care. The risks are seldom high enough to contraindicate care and all health care procedures have some risk associated with them.

Risks associated with some chiropractic treatment may include soreness, musculoskeletal sprain/strain, and fracture. Risks associated with physiotherapy may include the preceding as well as allergic reaction and muscle and/or joint pain. In addition there are reported cases of stroke associated with visits to medical doctors and chiropractors. Research and scientific evidence does not establish a cause and effect relationship between chiropractic treatment and the occurrence of stroke; rather, recent studies indicate that patients may be consulting medical doctors and chiropractors when they are in the early stages of a stroke. In essence, there is a stroke already in process. However, you are being informed of this reported association because a stroke may cause serious neurological impairment.

I have been informed of the nature and purpose of chiropractic care, the possible consequences of care, and the risks of care, including the risk that the care may not accomplish the desired objective. Reasonable alternative treatments have been explained, including the risks, consequences and probable effectiveness of each. I have been advised of the possible consequences if no care is received. I acknowledge that no guarantees have been made to me concerning the results of the care and treatment.

I have read the above paragraph. I understand the information provided. All questions I have about this information have been answered to my satisfaction. Having this knowledge, I knowingly authorize Rubinstein Family Chiropractic LLC, Dr. J. Shimon Rubinstein DC and/or Dr. Melissa Rubinstein DC to proceed with chiropractic care and treatment.
